

AISHWARYA L PUJERI

AI Engineer

Bengaluru, India

Contact

+91 8073249441

aishwaryapujeri23@gmail.com

Education

REVA University (RACE)

M.Tech in Artificial Intelligence
Nov 2025 - Nov 2027

GEC Ramangara

B.E in Computer Science | CGPA: 8.54
Dec 2021 - Jun 2025

Skills

Programming languages:- Python, Java, SQL, HTML, CSS

Libraries and frameworks:- Numpy, Pandas, Scikit-learn, Flask, Tensorflow, NLTK, Pytorch, OpenCV

Data Visualization:- Matplotlib, Seaborn, Plotly.

Tools and Platforms

VS Code, Google colab, Git, GitHub, Jupyter Notebook, PowerBI, MySQL, MSExcel, Eclipse IDE, Cisco Packet Tracer.

Soft Skills

Positive Attitude, Problem Solving, Quick Learner, Time management, Adaptability, Team Collaboration, Communication Skills.

Certificates

Python 101 for Data Science certification

SQL and Relational Database 101

About Me

Artificial Intelligence Engineer enthusiastic with a strong foundation in programming, algorithms, and machine learning. Skilled in building intelligent solutions using Python, TensorFlow, PyTorch, and modern AI technologies. Passionate about developing innovative, data-driven systems to solve real-world problems and create meaningful impact.

Work Experience

Java Developer Intern

Dhee Coding Lab

Completed hands-on training in Java, MySQL, HTML, and CSS, building web applications with front-end and back-end integration. Developed responsive interfaces and database-driven features to enhance application performance and user experience.

Projects

Jan 2025 - Jun 2025

Suspicious Activity Recognition using DL models

Personal Project

Designed and developed a deep learning-based suspicious activity detection system using CNN, LSTM, and YOLOv5 to analyze surveillance videos, detect abnormal events such as fire explosion, accidents, and weapons, and deliver real-time alerts through a Flask-based web application.

Fake News Detection using ML and DL models

Personal Project

Developed a fake news classification system using machine learning and deep learning models with NLP techniques such as text preprocessing, tokenization, TF-IDF, and embeddings to accurately distinguish between real and fake news articles using the ISOT and WELFake datasets.

Bus Ticket Booking System

Personal Project

Designed and developed a full-stack bus ticket booking web application using Python, MySQL, HTML, CSS, and JavaScript, enabling users to search routes, view available buses, and book tickets in real time with secure data management and responsive user interfaces.

Automated Duplicate File Finder

Personal Project

Developed a Python and PyQt desktop application to detect and manage duplicate files using SHA-256 hash-based comparison, multi-threaded scanning with ThreadPoolExecutor, and a rule-based NLP chatbot to provide storage insights and intelligent deletion suggestions.
