Education

REVA University

M.Tech in Artificial Intelligence
2025 – 2027

Presidency University

B.E in Computer Science & Engineering
2021 – 2025

Skills

- Programming** – Python, SQL, HTML/CSS
- Libraries** – NumPy, Pandas, Seaborn, Matplotlib, Streamlit, Scikit-Learn
- Tools & Frameworks** – Jupyter, Power BI, MySQL, Gradio, VS Code, PyCharm

Certifications

- Python 101 for Data Science
- SQL & Relational Databases 101
- Machine Learning with Python
- Power BI for Beginners
- Networking Fundamentals

About Me

Adaptable and curious individual passionate about solving real-world problems through innovation and data-driven thinking. Interested in exploring diverse domains, with a growing focus on healthcare analytics, and genomics. Committed to continuous learning and building impactful solutions.

Projects

Instagram Content Performance & Virality Audit Dashboard

- Built a Product Analytics dashboard to identify high-engagement content drivers and optimize algorithm reach.
- Identified key engagement factors: posting time, hashtags, content type, and audience interaction metrics.
- Built interactive visualizations tracking likes, shares, reach, engagement rate, and growth trends.

Automated Rental Discovery System

- Built an AI-powered rental intelligence system using Python, Streamlit, MySQL, Groq LLM, and Google Maps APIs
- Aggregated and ranked rental listings based on affordability, commute, and lifestyle metrics
- Implemented API caching, AI neighbourhood summaries, and automated WhatsApp alerts
- Developed an interactive dashboard with filters, comparisons and CSV report.

NGO Education Impact Analytics Dashboard

- Developed a Streamlit-based analytics dashboard with MySQL data mart to track school performance and program impact.
- Created SQL views & KPI pipelines for attendance, scores, instructor ranking, and regional insights.
- Built interactive Plotly visualizations (trends, scatter, comparisons) with dynamic filtering.
- Implemented data validation and anomaly detection for identifying low-performing schools.

AI-Based Prakriti Prediction System

- Developed an AI-driven system integrating questionnaire data, face image analysis, and chatbot interaction.
- Implemented ML models to classify Ayurvedic body types (Vata, Pitta, Kapha).
- Integrated multilingual chatbot support for improved accessibility
