

AMBIKA YALLAL

AI/ML Engineer

Contact

+91 9845148754

ambika.ry2000@gmail.com

Bengaluru, India

Education

REVA University (RACE)

M.Tech in Artificial Intelligence
Nov 2025 - Nov 2027

MM Engineering College

B.E. in Computer Science | CGPA: 8.5
Aug 2019 – May 2023

Skills

Programming Languages: Python, Java, SQL, HTML, CSS, Linux

Data Analysis & ML: NumPy, Pandas, Sci-kit learn, EDA

Data Visualization: Power BI, Matplotlib, Seaborn

Tools & Platforms: Jupyter Notebook, VS Code, MySQL, Google Colab, Excel

Soft Skills: Self Motivated, Quick Learner, Team Collaboration, Leadership Qualities, Willingness to Learn

Certificates

Python 101 for Data Science from IBM
SQL and Relational Database 101 from IBM
Power BI for Beginners
AI Tools Workshop from B10x

About Me

AI/ML enthusiast skilled in Python, Data Analysis, Statistics, and Machine Learning, with hands-on experience in Pandas, NumPy, SQL, and data visualization. Passionate about solving real-world problems using data and continuously learning new technologies and analytical techniques.

Work Experience

Java Developer Intern

KodNest Learning Centre

Completed hands-on Java development training using Java, MySQL, HTML, CSS, Git, and Agile practices to build and debug real-time mini projects collaboratively.

Projects

MRI-based Brain Tumor Classification

Personal Project

Developed an MRI-based brain tumor classification system using Deep Learning and Explainable AI techniques, to accurately detect tumor classes. Integrated uncertainty estimation and AI-based diagnostic reporting to improve model interpretability, reliability, and clinical decision support.

Customer Churn Prediction System

Personal Project

Built a customer Churn Prediction system using different algorithm, optimized with ROC-AUC, statistical testing, and GridSearchCV for accurate predictions. Deployed the best-performing model as a Streamlit app for real-time customer churn prediction.

Skill-based Resume Parser

Personal Project

Developed a Skill-Based Resume Parsing System using Python and NLP techniques to extract skills, education, experience, and personal details from PDF/DOCX resumes.

Automatic Video Summarization Using LLM

Personal Project

Developed an automated video summarization system using Python and Google Gemini API to extract key insights and generate structured notes from videos. Built an end-to-end pipeline with text extraction, LLM-based summarization, and automated email delivery for efficient content sharing.
