Education

Presidency University

BTech Computer Science and
Engineering 2025

REVA University

MTech Artificial Intelligence
2025 - 2027

Skills

- Programming language: Python
- Database: MYSQL, MongoDB
- Visualisation: Power BI and MS Excel
- Leadership
- Teamwork

Certifications

- Python 101 for Data Science
- SQL and Relational Database 101
- Machine Learning
- Power BI for Beginners
- Introduction to Cloud Computing

About Me

Aspiring AI Engineer with foundational knowledge of Python, machine learning, and data analysis. Interested in building intelligent systems, working with AI models, and developing data-driven solutions to solve real-world problems. Eager to learn, innovate, and grow in the field of Artificial Intelligence and emerging technologies.

Internship

Backend Development Intern – L&T Technology Services (Feb 2025 – May 2025)

Developed RESTful APIs using Python (FastAPI) and worked with PostgreSQL and MongoDB for backend data management. Implemented JWT authentication and AES encryption while following modular architecture and agile development practices.

Projects

AyurConnect – AI-Assisted Ayurvedic Wellness Platform

Developed an AI-powered Ayurvedic wellness and consultation platform using React, FastAPI, and MongoDB. Implemented Prakriti assessment, conversational symptom chatbot, personalized wellness recommendations, and AI-generated wellness summary PDFs. Designed role-based patient and doctor workflows with future-ready support for RAG, LLM integration, and digital consultation services.

Automated Personal Finance Management System (ML)

Worked with structured financial data to analyze spending behavior using machine learning techniques. Created insights and basic reports to support data-driven decision-making and performance tracking.

Blood Donation Management System

Built a blood donation management system to store and manage donor data efficiently. Applied database concepts for data organization, retrieval, and basic analysis.

LexiSight – Text-to-Infographic AI Tool

Built an AI-based system that summarizes long text, extracts keywords, and generates visual infographics using Python (TextRank, TF-IDF, WordCloud, Streamlit).
