

CHALUKYA NAYAKA B K

Cybersecurity Engineer

Contact

+91 9591225555

chalukyanayakabk2@gmail.com

Bengaluru, India

Education

REVA University (RACE)

M.Tech. in Cyber Security
Nov 2025 - Nov 2027

REVA University

B.Tech in Computer Science Engineering
Sep 2021 - Sep 2025

Skills

Cybersecurity & Networking

Strong foundation in computer science basics including operating systems, networking fundamentals, database management systems, web technologies, programming concepts, cybersecurity fundamentals, problem-solving, and software development principles, Vulnerability Assessment, TCP/IP, DNS, VPNs, Firewalls, Packet Analysis, Network Traffic Inspection, Vulnerability Analysis, Threat Identification, Understanding.

Soft Skills

Analytical Thinking, Problem Solving, Critical Thinking, Technical Report Writing, Team Collaboration, Communication Skills.

Tools

MS Office, MySQL Workbench, Cisco Packet Tracer, VS Code, WAZUH, Nmap, Splunk, Wazuh, MongoDB.

Certificates

Cloud Computing Masterclass Deployment to Administration

Python 101 for Data Science

SQL and Relational Databases 101

Networking Basics – Cisco

About Me

Aspiring Cybersecurity professional with interest in network security monitoring, anomaly detection, and DNS traffic analysis. Skilled in identifying suspicious activities and potential threats using cybersecurity tools and techniques. Passionate about Threat Detection and Cybersecurity Analysis through continuous learning and practical implementation.

Work Experience

ROBOSOFT Technologies, Bengaluru, India

ML Intern – Data Annotator

Worked on annotating and preparing high-quality datasets for machine learning applications, ensuring accuracy and consistency

Contributed to improving model performance by maintaining well-structured and reliable data

Projects

Jan 2025 - Jun 2025

Person Tracking System

Personal Project

Advanced Face Recognition

Anti-Spoofing & Secure

Authentication Real-Time Monitoring

API key management system

Personal Project

Secure Storage and Protection API keys are securely stored using encryption and access control mechanisms to prevent unauthorized access or misuse.

Access Control and Authentication The system manages who can create, use, revoke, or modify API keys and ensures only authorized users or applications can access APIs.

Web Vulnerability header Scanner

Personal Project

Automated multi-tool web vulnerability scanner.

Runs and correlates results from many security tools.

Classifies and reports vulnerabilities with severity levels.

Publication and Patent

Person Tracking System

Personal Project

Advanced Face Recognition

Anti-Spoofing & Secure

Authentication Real-Time Monitoring
