

DHANUSHA G

AI and Data Engineer

Contact

+91 9731326208

dhanusha.govind99@gmail.com

Bengaluru, India

Education

REVA Academy for Corporate Excellence,

REVA University, Bengaluru

M.Tech. in Artificial Intelligence

Nov 2025 - Nov 2027

Nitte Meenakshi Institute of Technology,

Bengaluru

B.E in Information Science and Engineering

CGPA: 7.8

Skills

Programming Python, SQL, HTML, CSS

Artificial Intelligence Prompt Engineering & LLM Optimization, RAG, NLM

Data Science & ML Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn, EDA, ML Algorithms

Computer Vision OpenCV, Image Classification, Image Segmentation, Feature Extraction.

Business Intelligence and Data Visualization Power BI, Interactive Dashboard Design, Data Storytelling.

Soft Skills Leadership qualities, Problem Solving, Creative, Efficient Communication, Adaptability, Decision making, and Active listener.

Certificates

Python 101 For Data Science -IBM

SQL and Relational Database 101 -IBM

About Me

AI enthusiast with expertise in machine learning, data science, and generative AI, complemented by hands-on experience in building real-world AI solutions. Proficient in Python, SQL, NLP, and modern AI frameworks, with the ability to translate complex business problems into scalable, data-driven solutions. Brings valuable industry exposure through enterprise system experience, demonstrating strong problem-solving, adaptability and readiness for AI- driven roles in production environments.

Work Experience

Salesforce Administrator

08/2022 – 02/2025

Managed Salesforce administration by configuring users, roles, permission sets, security controls, objects, and workflows. Designed automated business processes using Flows and Process Builder while creating reports and dashboards for efficient decision-making.

Projects

RACEOne an AI-assisted capstone workflow platform

Developed RACEOne, an AI-assisted capstone workflow platform with secure role-based dashboards, workflow automation, AI-powered proposal and documentation assistance, and scalable full-stack architecture using Next.js, TypeScript, Prisma ORM, and Tailwind CSS to enhance academic project management and user experience

Chat with PDF using RAG

Developed an AI-powered PDF Question Answering system using RAG architecture, FAISS vector search, and LLM integration to enable semantic document retrieval, context-aware responses, and real-time interactive chat with PDF documents.

Leaf Disease Detection using Image Processing & CNN

Developed a deep learning-based Leaf Disease Detection system using CNN and image processing techniques to classify plant diseases through image preprocessing, data augmentation, and model training for improved accuracy and robust prediction.

An AI-Powered Personalized Education and Career path advisory and recommendation

Developed a deep learning-based Leaf Disease Detection system using CNN and image processing techniques to classify plant diseases through image preprocessing, data augmentation, and model training for improved accuracy and robust prediction.
