👤 Vinit Mevada

Profile

Aspiring cybersecurity with hands-on experience in web application security testing and vulnerability assessment. Skilled in identifying OWASP Top 10 vulnerabilities using platforms like DVWA, OverTheWire, and PortSwigger Web Security Academy. Proficient with tools such as Burp Suite, Nmap, Metasploit, and Wireshark for security analysis. Strong understanding of web application security, network reconnaissance, and attack techniques. Actively pursuing a career as a Penetration Tester or Red Team professional through continuous learning.

Education

M. Tech in Cyber Security

REVA University, Bengaluru, India

Nov 2025 – Nov 2027

B. Tech in Computer Science and Engineering

VSITR, Gandhinagar, India

Sep 2021 – Apr 2025

- CGPA – 7.48

Skills

Technical Skills

VAPT, Broken authentication, Broken access control, SQL injection, Cross-site scripting, Security misconfiguration, IDOR Sensitive data exposure, OSINT, MS Office Suite, Technical Report Writing, Steganography, Network Scanning, Reconnaissance, Linux, OS, FTP, SSH.

Tools

Burp Suite, Google dorking, Nmap, Nikto, Kali Linux, Wireshark, ZAP, Metasploit, Sqlmap, John the ripper, Shodan, sub finder, httpx, waybackurls, dig, Netdiscover, Dirb, Hydra, Dirsearch, Nuclei, MSF Venom, MSF console, netcat.

Soft Skills

Quick learner, Teamwork, Problem Solving, Proactive Attitude, Adaptability, Leadership Qualities.

Work Experience

Cyber Security Intern — The Red Users

May 2025 – Jun 2025

- Gained foundational knowledge in network basics, including protocols, IP addressing, and network scanning.
- Learned the basics of web application security, covering common vulnerabilities like XSS and SQL Injection.
- Explored practical tools and techniques for assessing web security and understanding security workflows.
- Developed basic skills in vulnerability reporting, documenting findings clearly for review and learning purposes.

Cyber Security Intern — Way2Reach

Jun 2025 – Sep 2025

- Conducted web application security testing using OWASP ZAP, including identifying and analysing SQL injection, XSS, and other common vulnerabilities.
- Prepared detailed vulnerability reports with risk assessment, remediation suggestions, and documentation for management with the help of ZAP.
- Gained practical experience in security, vulnerability assessment workflows, and reporting standards,
- contributing to the organisation's overall security posture.

Projects

Vinit_Auto_Recon – Automated Reconnaissance Tool 🔗

Dec 2025

- Developed a menu-based automated reconnaissance tool for cybersecurity learners and bug bounty hunters.
- Integrated industry-standard tools (Subfinder, HTTPX, Nmap, Dirsearch, Nikto, Waybackurls) to rapidly collect critical domain intelligence.
- Built a localhost web interface with a Linux-based backend, enabling users to run recon operations through a browser.
- Designed for easy deployment on Linux, allowing users to clone, install, and run the tool with minimal setup.
- Streamlined and organized reconnaissance workflows to make recon faster, structured, and beginner-friendly.

VinXcrypt Pentest (On going)

Jan 2026

- Developed Web Pentest AI, an automated web application penetration testing tool focused on identifying vulnerabilities aligned with the OWASP Top 10.
- Implemented intelligent detection techniques to test for common risks such as SQL Injection, XSS, Broken Authentication, Security Misconfigurations, and Sensitive Data Exposure.
- Automated reconnaissance, payload testing, and response analysis to simulate real-world attack scenarios.
- Designed the tool to generate structured vulnerability findings, helping users understand impact, risk, and remediation.
- Built with a beginner-friendly approach, enabling cybersecurity learners to practice OWASP-based web security testing efficiently.

Hall-of-Fame & Certifications

- **Hall-of-Fame :** NASA, New Balance, Cisco Meraki, US General Service Administration (GSA), Centre of Medicare Services(CMS), Universal Service Administrative (USA), PostHog, Interwell Health, Santos, Magnolia, Tlu, Voiceofgeereans.
- **Deloitte Virtual Internship Certificate (2025):** Detected and mitigated unauthorised access by analysing log files, blocking suspicious IPs, and reporting findings to the security team.
- **TCS Virtual Internship Certificate (2025):** Completed a virtual Cybersecurity Analyst internship, getting practical skills in cybersecurity and collaborative teamwork.
- **Certificate of Appreciation – Way2Reach (2025):** Awarded for good performance and contributions during the internship.
- **Certificate of Appreciation – Versatile Technology (2025):** For identifying bugs.
- **Cyber Security Associate Certificate Program (2025) :** Hands-on exposure to cybersecurity fundamentals, security tools.
