

NITHYA T M

Cybersecurity & GRC Aspirant

Contact

+91 9110618926

nithyatm045@gmail.com

Bengaluru, India

Education

REVA University (RACE)

M.Tech in Cyber Security

Nov 2025 - Nov 2027

Sri Taralabalu Institute of Technology

B.E. in Electronics & Communication

Sept 2021 - Jun 2025

Skills

Programming & Scripting

Python, SQL, TypeScript, HTML5, CSS3, IoT Fundamentals.

Security Concepts

SIEM Monitoring, Threat Detection, Log Analysis, Network Security, VAPT, GRC, Risk Analysis, Security Governance, Intrusion Detection, Vulnerability Assessment.

Tools

Wireshark, pfSense, Splunk, Wazuh, Cisco Packet Tracer, Power BI, VS Code, FreeRadius, Kali Linux.

Certificates

Python 101 for Data Science

Networking Basics

SQL and Relational Database

About Me

Cybersecurity postgraduate with strong interest in Governance, Risk, and Compliance (GRC). Skilled in risk assessment, SIEM monitoring, network security, and cybersecurity automation. Familiar with Python, Wireshark, Splunk, and Wazuh. Passionate about threat detection, security operations, and vulnerability assessment.

Work Experience

Web Development Intern

Feb 2025 - May 2025

Internz Learn

Built responsive web pages using HTML5 and CSS3. Designed structured layouts with Flexbox and Grid. Created user-friendly interfaces with smooth navigation and responsive design principles.

Projects

Network Access Control (NAC) System

Personal Project

Developed a NAC system to allow only authorized devices on the network. Detected and blocked unauthorized devices in real time. Monitored network traffic for security visibility using Kali Linux, Wireshark, and FreeRadius.

Brute-Force Detection & SIEM Alerting

Personal Project

Monitored authentication logs to detect brute-force and credential stuffing attacks. Generated SIEM alerts using Wazuh/Splunk for suspicious login activity. Automated malicious IP blocking using Python scripts integrated with firewall rules.

AI-Powered Cybersecurity Awareness Chatbot

Personal Project

Developed a full-stack AI chatbot using React.js and Groq API to educate users on cybersecurity topics. Designed structured prompts based on NIST SP 800-50 guidelines with session tracking and real-time error handling.

AI-Powered News Curator CLI

Personal Project

Built an AI-powered news curation CLI using TypeScript, Supabase, and OpenRouter APIs to automate article ranking and filtering. Implemented intelligent duplicate detection and structured JSON logging with configurable dry-run and article limit features.
