Bengaluru, India

Education

REVA University (RACE)

M.Sc. in Cyber Security
Nov 2025 - Nov 2027

REVA University

B.Sc. in Cyber Security | CGPA: 8.54
Sep 2022 - Sep 2025

Skills

Cybersecurity & Networking

Web Application Security (OWASP Top 10), Vulnerability Assessment & Penetration Testing (VAPT), Network Security Fundamentals, TCP/IP, DNS, VPNs, Firewalls, Packet Analysis, Network Traffic Inspection, Vulnerability Analysis, Threat Identification, Understanding of Common Web Attacks (XSS, SQL Injection).

Soft Skills

Analytical Thinking, Problem Solving, Critical Thinking, Technical Report Writing, Team Collaboration, Communication Skills.

Tools

Burp Suite, Nmap, Wireshark, Nikto, OWASP ZAP, SQLMap, Metasploit, Sublist3r, Hashcat, Nessus, John the Ripper, Wappalizer, XSSStrike, Nuclei, Splunk, Wazuh.

Certificates

CCST - Cisco
IT Specialist - Cybersecurity
Network Security - IT Specialist
Python 101 for Data Science
SQL and Relational Databases 101

About Me

Cybersecurity enthusiast with hands-on experience in vulnerability assessment and security monitoring. Completed a Security Analyst internship at SECIQ Technologies, contributing to web application security testing, alert analysis, and incident response operations.

Work Experience

Security Analyst Intern

SECIQ Technologies

Conducted vulnerability assessments on web applications using Nmap, Burp Suite, and Nessus. Assisted in penetration testing and prepared technical reports documenting findings and remediation steps.

Projects

Jan 2025 - Jun 2025

Web App Vulnerability Assessment

Personal Project

Performed structured security testing aligned with OWASP Top 10. Identified XSS, SQL Injection, and HTML Injection using Nmap, Nikto, SQLMap, and Burp Suite for scanning and exploitation support.

Automated Network Port Scanner

Personal Project

Developed a multi-threaded network port scanner using TCP socket programming. Implemented scanning techniques to identify open, closed, and filtered ports with efficient logic to reduce scan time.

Malicious QR Code Checker

Personal Project

Analyzed QR code-based attack vectors including phishing redirects. Built logic to detect suspicious links using URLScan and header analysis techniques.

Cryptography Encryption & Decryption Tool

Personal Project

Developed a menu-driven tool implementing symmetric and asymmetric encryption techniques for encrypting and decrypting user-provided text input.
