

SHASHWATH K S

AI Engineer

About Me

AI Software Engineer focused on building intelligent systems through Python-based Computer Vision and full-stack integration. Proficient in developing robust, scalable AI-driven applications and secure software architecture. Committed to deploying production-grade systems that catalyze organizational success while pioneering advanced methodologies in the AI domain.

Experience

Snyce Automations

Mar 2025 – Jun 2025

Internship Trainee (Full-Stack)

Integrated 4 backend services directly with company infrastructure, ensuring architectural consistency and secure data flow across 3 system microservices.

Rooman Technologies

Sep 2024 – Mar 2025

Student Ambassador (AI & DevOps)

Coordinated and supervised technical training sessions, ensuring smooth delivery of curriculum and consistent engagement from the student developer community.

Projects

AegisFace: Adversary Resistant Facial Recognition & Location Aware Attendance

Provides a secure, location-aware attendance solution that enforces verified physical presence through multi-factor identity proofing mechanisms.

Lane Detection for Autonomous Vehicles using Neuro-Fuzzy Algorithms

Ensures robust, explainable navigation by combining deep learning-based perception with logic-driven reasoning to handle environmental uncertainty effectively.

AutoDoc AI: Semantic-Aware File Converter with LLM Documentation

Automates generation of context-aware docstrings and professional reports to maintain documentation quality and team synchronization.

Education

MTech in AI

REVA Academy for Corporate Excellence

RACE, REVA University, Bengaluru, India.

Nov 2025 – Nov 2027

B.E in CS&E

KVG College of Engineering, Sullia, India

Nov 2022 – June 2025

CGPA – 9.47

Skills

Technical Skills

Python, ML, MongoDB, SQL, React.js, Dart, TypeScript, Data Warehousing, LLM Integration.

Soft Skills

Agile Development Quick learner, Teamwork, Problem Solving, Critical and Analytical Thinking, Proactive Attitude, Adaptability.

Tools

Github, Docker, PowerBI, Firebase, Git, VSCode, IntelliJ Platforms, FastAPI, Django.
