Education

REVA University

M. Tech in Artificial Intelligence
2025 - 2027

Sai Vidya Institute of Technology

B.E in CSE(Data Science)
2021 - 2025

Skills

Technical Skills

- Python, HTML, CSS, Bootstrap, SQL, PowerBI

Tools

- VS Code, Eclipse, MySQL Workbench, Jupyter, PowerBI, MS Excel

Soft Skills

- Quick Learner, Communication, Team Work, Adaptability

Certificates

- SQL and Relational Database 101 – IBM
- Python 101 for Data Science – IBM
- Java Programming Certification – QSpiders

About Me

Dedicated and detail-oriented IT graduate. Passionate about software development, with strong problem-solving abilities and a drive to learn and adapt to new technologies. Looking to work in an organization that provides opportunities to expand skills and knowledge in the Software industry while working towards achieving organizational goals.

Projects

Two Way Sign Language Translation using CNN

- Designed and implemented a two-way sign language translator to bridge communication between the hearing-impaired and the general public.
- Applied Convolutional Neural Networks (CNN) to recognize sign language gestures through camera and convert them into text and multilingual audio.
- Integrated Google Speech Recognition API for accurate voice input processing.

Healthcare Appointment and Record Management System

- Developed a web-based system using Python, Flask, HTML, and CSS to streamline hospital operations and appointment scheduling.
- Integrated MySQL database for secure management of patient records, appointments, prescriptions, and feedback.
- Implemented appointment booking, medical record management, and PDF prescription generation using ReportLab

AI -Powered Smart Learning & Academic Support System

- Developed an AI-powered system using Python and Google Gemini API to automate study note generation, quiz creation, and performance evaluation.
- Designed an interactive UI using Gradio to enhance user engagement and provide seamless learning support.
- Integrated quiz, flashcard, and confidence tracking modules with automated answer evaluation to identify weak areas.
- Implemented PDF processing and activity management using PyPDF, FPDF, and JSON for syllabus extraction and notes generation.

Employee Performance Evaluation Using ML

- Developed a machine learning-based Employee Performance Prediction system using Python to classify performance into Low, Medium, and High categories.
- Performed data preprocessing, EDA, and feature selection using LASSO to improve prediction accuracy.
- Built and trained a Random Forest model, achieving efficient and reliable classification results.
